

Google just made everyone a data analyst.

No Power BI. No analyst. One prompt.

Executive Dashboards

Interactive charts, KPI cards, drill-down filters

Kanban Boards

Drag & drop tasks, update status in real time

Heat Maps

Visualize patterns across your data instantly

Calendars & Galleries

Plot dates, sort and filter card layouts

Built with a single prompt. No code.

1

Bottom bar **EASIEST**

Click the Canvas icon next to your sheet tabs → Create a canvas

2

Menu bar

Insert → Create a canvas

3

Side panel

Tools → Create canvas

☐ **Tip:** Desktop only for now. Find your canvases any time in the bottom tab bar.

Requires paid Google Workspace (Business Standard+) or Google AI Pro. US & English only.

Create an interactive executive dashboard with regional sales breakdown, monthly trend lines, and drill-down by department. Make it filterable by quarter.

→ **Paste into the Canvas prompt box and hit Enter.**

Multi-tab tip — run this in Gemini first:

Consolidate data from the Q1, Q2, and Q3 tabs into a single summary tab organized by region and month.

For context: I've run 12+ four-hour workshops for Canadian consultants and startup founders on practical AI implementation. Tools like this are always on the agenda.

June session is coming — and this one includes something new: building AI agents in Claude CoWork.

Follow along if you want to be in the loop.
